**CONTENTS**

11 Reflections, Elaborations, and Discussions with Readers 383

11.1 CAUSAL, STATISTICAL, AND GRAPHICAL VOCABULARY ............... 384
  11.1.1 Is the Causal-Statistical Dichotomy Necessary? ................. 384
  11.1.2 d-Separation without Tears (Chapter 1, pp. 16–18) ............... 388

11.2 REVERSING STATISTICAL TIME (CHAPTER 2, pp. 58-9) ............... 391

11.3 ESTIMATING CAUSAL EFFECTS .................................. 393
  11.3.1 The Intuition behind the Back-Door Criterion (Chapter 3, p. 79) . 393
  11.3.2 Demystifying “strong ignorability” .......................... 397
  11.3.3 Alternative proof of the back-door criterion .................... 400
  11.3.4 Data vs. knowledge in covariate selection ..................... 403
  11.3.5 Understanding Propensity Scores ........................... 406
  11.3.6 The Intuition behind do-Calculus ............................ 410
  11.3.7 The Validity of G-estimation ............................... 411

11.4 POLICY EVALUATION AND THE do-OPERATOR ...................... 413
  11.4.1 Identifying conditional plans (Section 4.2, p. 113) .............. 413
  11.4.2 The meaning of indirect effects ............................ 414
  11.4.3 Can do(x) represent practical experiments? .................... 417
  11.4.4 Is the do(x) operator universal? ............................ 418
  11.4.5 Causation Without Manipulation!!! .......................... 420
  11.4.6 Hunting Causes with Cartwright ............................. 421
  11.4.7 The Illusion of Nonmodularity ............................... 423

11.5 Causal Analysis in Linear Structural Models ....................... 425
  11.5.1 General criterion for parameter identification (Chapter 5, pp. 149-54) 425
  11.5.2 The causal interpretation of structural coefficients ............. 426
  11.5.3 Defending the Causal Interpretation of SEM (or, SEM Survival Kit) 429
  11.5.4 Where Is Economic Modeling Today? – Courting Causes with Heckman ............. 435
  11.5.5 External Variation vs. Surgery ................................ 437

11.6 DECISIONS AND CONFOUNDING (CHAPTER 6) ....................... 442
  11.6.1 Simpson’s paradox and decision trees ........................ 442
  11.6.2 Is Chronological Information Sufficient for Decision Trees? .... 444
  11.6.3 Lindley on Causality, Decision Trees, and Bayesianism .......... 446
